DETAILED ACTION

Response to Arguments

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. The applicant argues in the responses filed on July 22, 2008 and November 4, 2008 that Watanabe et al. (USPN 5,721,091) fails to cite the structural features of claims 1-7. The examiner has found these arguments to be persuasive since Watanabe does not appear to teach the placement of optical control modules used for alignment within exposure fields of the wafer while displacing a portion of the IC area with the alignment control modules while also having the suggested positioning of the control module fields.

Allowable Subject Matter

3. Claims 1-7 are allowed.
4. The following is an examiner's statement of reasons for allowance: the examiner is unaware of any prior art which suggests or renders obvious a wafer with a number of exposure fields, a number of lattice fields in each exposure field, first and second dicing paths (in respective first and second directions which intersect) which divide the lattice fields while two control module fields (which each contain at least one optical control module) are in each exposure field but are not in the dicing paths such that each control module field is provided in place of a preset number of lattice fields and the two control

module fields of each exposure field are arranged at an average distance from one another extending in the second direction that is equal to at least a quarter of the side length of a side of the exposure field extending in the second direction as suggested in claim 1.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
